

CHEAT SHEET

HANG OUR BOARDS (AND ANYTHING ELSE)
ON THE WALL THE RIGHT WAY

No Fail Hanging System

Supplies Needed -

- measuring tape
- masking tape
- pencil
- level

Step by step
instructions for
doing it right
the first time

1. Measure the overall width of the frame. Cut a piece of masking tape this length.
2. Determine the exact height of where the top of the frame should be on the wall. If you are unsure go lower than you think... not higher. Put the piece of tape on the wall at the height you determine.
3. Stand back and be sure you are satisfied with the height you chose. This will be the TOP of the frame.
4. Measure the tape and divide by two to find the center of the frame. Make a mark on the tape designating the center.
5. On the back of the frame measure down from the top of the frame to the top of the 2 hooks. These 2 measurements must be the same. If they aren't adjust the hangers so they match up.
 - Write it down here _____
6. Go back to the wall. From the mark you made of the tape, measure down the exact amount you measured in step 5.
7. Remove the tape from the wall.
8. On the back of the frame measure the distance between the two hooks.
 - Write it down here _____
9. Divide this number by 2.
 - Write it down here _____
10. Go back to the wall. Starting at the mark you made on the wall, measure to the left the exact amount you wrote down in step 5. Make a tiny mark on the wall. This is the spot that will be the bottom of the left wall hanger.
11. Find a level that is at least as long as the number you wrote down in step 8.
12. On the top that level make 2 tiny marks with a pencil or marker... one on the left and one on the right. These need to be exactly the distance apart that you measured in step 8.
13. Go back to the wall. Place the level on the wall. The left mark on the level needs to be on the far left mark on the wall that you made in step 10.
14. Being sure that the bubble is in the center of the lines on your level, make a tiny mark on the wall where the right side mark is on top of your level.
15. Install your two wall hooks. One on the left, one on the right. The bottom of the hooks should be exactly on the marks.
16. Hang your board!
